

Transform Your Career with SocialPrachar's Data Science & AI Program

An industry-aligned, job role-specific career accelerator that opens doors to 10+ high-demand tech positions in just 6-7 months.

Program Preview

1 — Data Analytics (0-3 Months)

SQL, PowerBI, Tableau, Python, Excel

2 — Data Science (4th & 5th Month)

Machine learning, Statistics, Python(Advanced)

3 — AI, Cloud, Internship (2-3 Months)

A Full Day Internship Program at our Offices - Learn NLP, DL, CV, AWS & DevOps

Certifications from IBM, Microsoft, Nvidia Etc & Interviews starts from after ML completion onwards !!

Master 4 Critical Domains for Tech Industry Success

Data Analytics

Develop expertise in transforming raw data into actionable insights through statistical analysis, data visualization, and business intelligence tools.

Data Science

Learn to apply scientific methods, algorithms, and machine learning techniques to extract knowledge and insights from structured and unstructured data.

Artificial Intelligence

Master the fundamentals of AI, including neural networks, computer vision, and natural language processing to build intelligent systems.

Cloud & DevOps (AWS)

Gain hands-on experience deploying and scaling data solutions on AWS, applying DevOps principles for efficient development workflows.

Our comprehensive curriculum is meticulously designed to meet real-world industry demands, giving you the competitive edge in today's tech job market.

Unlock 10+ High-Demand Career Paths

Upon completion, you'll possess the versatile skill set necessary to pursue multiple lucrative career paths in the data and AI ecosystem.

Data-Focused Roles

- Data Analyst
- Data Scientist
- Data Engineer

AI & ML Specialists

- Machine Learning Engineer
- AI Engineer
- Computer Vision Engineer
- NLP Engineer

Development & Cloud

- Python Developer
- SQL Developer
- AI Developer

Comprehensive Two-Phase Learning Journey

1

Training Phase (First 4 Months)

- Daily live classes (3 hours/day) with industry experts
- Balance of conceptual learning and hands-on projects
- Weekly assignments and assessments to track progress
- Build foundational knowledge in all four domains

2

Internship + Advanced Training (Next 3 Months)

- Full-day internship experience (6 hours/day)
- Continued live training (2 hours/day)
- Advanced modules in Machine Learning, Deep Learning, and cutting-edge AI tools
- Earn up to ₹45,000 INR during internship (after passing Stipend Eligibility Test)

This comprehensive approach ensures you not only understand theoretical concepts but can apply them confidently in real-world scenarios—making you immediately valuable to employers.

Hyderabad's Only Stipend-Based Internship Program

Unique Opportunity

Unique opportunity in Hyderabad to earn while you learn.

Financial Benefit

Students can earn up to ₹45,000 INR during their internship period.

Eligibility

Must pass the Stipend Eligibility Test to qualify for earnings.

Real-World Experience

Real work experience with actual companies.

Career Bridge

Bridge the gap between learning and professional employment.

Skills & Support

Gain practical skills while receiving financial support.

Comprehensive Training

Full-day internship experience (6 hours/day) combined with continued training.

Cross-Functional AI Projects: Build Real AI Products

Experience a simulated startup environment where you'll collaborate in cross-functional teams to build and deploy complete AI products.

Collaborative Teams

Work in 5-member teams (**2 Data Science & AI students, 2 Full Stack Developers, 1 Cloud & DevOps student**) mirroring real tech company structures.

Real-World Projects

Develop complete AI products like AI-Powered E-Commerce Portals, Job Recommendation Platforms, Fitness Tracking Apps, and Movie Recommendation Systems.

Portfolio-Ready Results

Don't just learn—build, deploy, and showcase actual AI products that demonstrate your abilities to potential employers.

Projects - Data Science Full-Stack Development AWS and DevOps

A comprehensive collection of project ideas combining Data Science, Full-Stack Development, AWS Cloud Services, and DevOps practices for building modern, scalable applications.

Global Certifications to Validate Your Expertise

Boost your CV with globally recognised certifications from industry leaders in technology. These credentials validate your skills and significantly enhance your employability in the competitive tech job market.

Each certification serves as tangible proof of your expertise in specific domains, giving employers confidence in your capabilities and helping you stand out from other candidates.

Industry Leaders

- IBM Certification - Data Science
- Microsoft Certification - Python
- Google Data Analytics
- Google Certification - AI

Specialised Credentials

- Nvidia Certification - AI
- Course Completion from SocialPrachar
- 6 Months Internship Certification from AI Companies

Our Track Record of Excellence

16,000+

Students Trained

Across India in Data Science, AI, Full Stack, and Cloud technologies, creating a vibrant community of tech professionals.

100%

Interview Guarantee

Consistent success in helping graduates secure rewarding positions in top technology companies across the country.

9+

EdTech Awards

Recognised for excellence in skill-based education, including the prestigious "Best Training & Development Company" award by Telangana IT Minister.

1100+ Hiring Partners in Hyderabad, Bengaluru, Pune, Mumbai & Chennai . Our strong industry connections provide students with exceptional internship and placement opportunities at leading technology firms, ensuring a smooth transition from learning to earning.

Data Analyst: 8-Year Career Progression

Years 0-2: Entry Level

Start as a Trainee/Junior Data Analyst (₹3-5 LPA) mastering Excel, SQL, and basic visualisation tools. Progress to Data Analyst (₹5-7 LPA) with advanced Excel, SQL joins, dashboards, and basic Python.

1

2

3

4

Years 4-6: Leadership

Progress to Lead Data Analyst (₹13-16 LPA) leading analytical teams. Reach Analytics Manager (₹16-20 LPA) developing data strategies and managing stakeholders.

Years 2-4: Mid-Level

Advance to Associate Data Analyst (₹7-10 LPA) with Python scripting and ETL basics. Reach Senior Data Analyst (₹10-13 LPA) with data storytelling and A/B testing skills.

Years 6-8: Executive

Become a Data Analytics Consultant (₹20-25 LPA) with domain expertise. Culminate as Director of Data Analytics (₹25-35+ LPA) defining KPIs and leading teams of 5-20 people.

Data Science: Your Path to Tech Leadership

Years 0-1: Data Science Intern

Start as a Data Science Intern (₹4-6 LPA), mastering Python, SQL, basic ML (sklearn), and data manipulation with pandas and matplotlib. Build foundational projects on regression, classification, and exploratory data analysis, while starting your GitHub portfolio with Kaggle projects.

1

2

Years 1-2: Junior Data Scientist

Advance to Junior Data Scientist (₹6-9 LPA), deepening your expertise in ML algorithms, Jupyter notebooks, and scikit-learn for feature engineering. Contribute to building ML pipelines and participate in developing real-world predictive models.

3

Years 2-3: Data Scientist

Become a Data Scientist (₹9-13 LPA), specialising in NLP, Time Series analysis, and advanced model tuning. Gain basic cloud knowledge (AWS/GCP) to own end-to-end ML models and integrate them into critical business applications.

4

Years 3-4: Senior Data Scientist

Progress to Senior Data Scientist (₹13-18 LPA), building foundational knowledge in deep learning (TensorFlow/PyTorch) and designing robust data pipelines. Begin mentoring junior team members and take the lead on impactful data science projects.

5

Years 4-5: Machine Learning Engineer

Transition to Machine Learning Engineer (₹18-22 LPA), focusing on model deployment, CI/CD for ML, and MLOps tools (MLFlow, Airflow, FastAPI). Take full responsibility for the end-to-end machine learning lifecycle, from development to production.

6

Years 5-6: Data Science Team Lead

Step into a Data Science Team Lead role (₹22-28 LPA), mastering team management, project planning, and aligning data science initiatives with business objectives. Drive the successful delivery of value-driven ML projects, while actively hiring and mentoring talent.

7

Years 6-7: Principal Data Scientist

Ascend to Principal Data Scientist (₹28-35+ LPA), leading advanced research and experimentation. Develop expertise in big data technologies (Spark, Hive) and complex system design, defining the long-term data science vision for the organisation.

8

Years 7-8: Head of Data Science / Chief DS

Reach the pinnacle as Head of Data Science or Chief Data Scientist (₹35-50+ LPA), overseeing strategic planning, budget management, and fostering cross-team collaborations. Represent data science in board meetings and drive innovation at an organisational level.

AI Engineer: Your Path to Tech Leadership

Early Career (Years 0-3)

Begin as an AI Intern (₹5-7 LPA) working on small AI projects. Progress to AI Developer (₹7-10 LPA) building scalable models, then to AI Engineer (₹10-15 LPA) owning product features using technologies like LLMs and GANs.

Mid-Career (Years 3-5)

Advance to Senior AI Engineer (₹15-20 LPA) optimising models for production. Reach AI Architect (₹20-28 LPA) designing entire AI systems and managing scalability challenges.

Leadership (Years 5-8)

Progress to AI R&D Lead (₹28-35 LPA) driving innovation, then to Director of AI (₹35-45+ LPA) defining organisational AI strategy. Culminate as Chief AI Officer (₹45-60+ LPA) representing AI at the executive level.

Meet Our Successful Alumni Student Reviews

“

"The practical approach taught me exactly what employers are looking for. The real-world projects helped me build a strong portfolio and understand complex concepts."

”

“

"The career transformation I experienced is incredible. From uncertainty to a thriving tech career, their support made all the difference. Highly recommend!"

”

“

"The instructors are highly knowledgeable and supportive. They don't just teach; they mentor. The placement team went above and beyond to ensure I found the right fit."
